

Seminar on Protecting Chemical Innovations

A seminar lecture was jointly organized by Department of Chemistry and Directorate of RDRM on Intellectual Property Rights (IPR) was delivered by Advocate MsShalini Menezes at the Lecture Hall I of Department of Chemistry, Goa University on 20th September 2018 at 3:30 pm. The title of the talk was “Protecting Chemical Innovations”. Advocate Shalini began the seminar by defining, what is a Patent? the benefits of filing a Patent and different laws and regulations that govern these Patents; more in the context of Indian Patent laws. The focus of the seminar was channeled towards classifying patents and understanding which ideas can be termed as intellectual properties which are worth patenting. The audience that included faculty members, research scholars and students from chemistry and sister departments were briefed about the important distinction between “Good Patents” were termed as “Bad Patents”. The importance of maintaining systematic research note books and how it can aid in successful filing of patent was also signified. Overall it was an interactive session which benefited every participant in the audience.
